In 1993, Alaskans embarked on a campaign to bring higher standards and accountability to their public school system. The cornerstone of this effort was the development of content standards in ten core subject areas. The standards represent what Alaskans want students to know and be able to do as a result of their public schooling. During 1994 and 1995, the Alaska State Board of Education adopted these standards and key elements as voluntary guidelines for Alaska’s schools.
